TRANSPORTATION FINANCE

## Fleet Factoring

### ***Utilize the power of DTF in your business.***

Diversified Transportation Finance can speed up the cash flow of your business with our Factoring and A/R Financing programs. We know cash is the life blood of your business and that you can't wait for your customers to pay you when you need to pay drivers, buy fuel, make equipment payments, pay for insurance repairs and much more. The faster you can move your cash, the more money you can make.

Depending on your needs, you may choose a traditional factoring program where we advance the same percentage to you on each eligible invoice you submit or you can choose an A/R financing program where we set up a line against your invoices with a small administrative fee. We'll help you decide which is right for you.

#### **Credit Checks & Monitoring**

We can save your company time by making sure you are working with quality customers. Use our services to learn information about your customer and to alert you to brokers, shippers or other firms that do not pay promptly.

#### **Collections**

We will handle following up on payment from your customers, faxing missing paperwork, etc. so you can focus on making money. We are not a collection firm, but by having an organized approach to getting invoices paid, we will collect on invoices faster. Quicker collection means lower fees for you.

#### **Invoice Creation, Mailing and Account Maintenance**

Reduce the delay between completion of your services and billing for those services. This reduces the time it takes to receive payment on your invoices and increases your cash flow.

#### **Cash Application**

DTF receives your payments and applies them to your invoices this will assist your back office in monitoring your accounts receivable.

#### **Online Reports and Check View Systems**

Allow you to monitor your accounts 24 hours a day. There is no need to wade through faxed paper reports of your account collection activity. Online reports are built with advanced security to protect your information and privacy.
